Tutorials for the TI-83 & TI-84 Families of Graphing Calculators

2. Find Product Support in the middle of the page.
   
   **Option 1**
   5. Select HotmathTI-83/TI-84 from the drop down list.
5. Select the topic you need to learn about from the menu.
7. On the right the steps will appear, and in the middle a hand will show these steps carried out on the calculator. There isn’t any sound.

   **Option 2**
   5. Select Atomic Learning Basics from the drop down list.
6. Find Expand All above the menus and click on it.
7. Select the topic you need to learn about from the menu.
8. Be sure the sound is on. This tutorial does have sound.

On step 5 you are welcome to try some of the others from the drop down list too. These are my 2 favorites.

Tutorials for the TI-89

2. Find Product Support in the middle of the page.
4. Find TI-89 on the left.
5. Click on WatchMe Ware TI-89 Tutor Quick Start.
6. Under Quick Start click on Download.
7. If a box appears that has Run, click on it.
8. On the setup menu click next.
9. Continue to click next being sure to note where you are saving the program. (I continued to click next each time and it saved it in my programs.)
10. Click close to exit setup.
11. You will get a box with 3 icons. Select the one that reads TI-89 Tutor. If you want to go back to the tutorial later, go to your programs and look for Watchmeware.
12. On the registration screen click on Demo.
13. Select the topic you want to learn about from the menu on the left.
14. Directions will appear on the right for the example given.
15. Use your mouse to click on the buttons of the calculator in the middle of the screen as the instructions on the right direct you.
