### Job title: Technical Laborer

### Location: Birmingham, Alabama

#### About the Opportunity:
During the past 19 years, ICT has built a worldwide reputation as a results oriented company in the areas of pulverizer and boiler testing, combustion troubleshooting, consulting, and training services to the fossil fired power plant industry. We excel in the areas from the pulverizer to the stack because we understand power plant processes and operations. As a complement to our core business, we now offer a full array of diagnostic and compliance environmental testing services.

Innovative Combustion Technologies, Inc. provides a unique environment that fosters individual growth, rewards performance, and also provides an opportunity to work with highly motivated professional engineers and contribute to a team effort.

#### Position Description:
Minimum of 50% of total time is spent in the field providing support services and performing general errands for other team members. He/she will also assist the field service specialist and technicians in setting up and removal of test equipment at the testing location with the remaining time devoted to performing building maintenance, cleaning vehicles, loading and unloading equipment from vans and trailers, etc. in our Birmingham office when no field work is being performed.

#### Qualifications:
- The ability to work in a dirty and hot (extreme heat: 100°+ at times) environment climbing stairs and ladders
- The ability to lift approximately 100 lbs.
- Hard worker
- Dependability
- Ability to travel (includes some weekends)
- Clean driving record/Valid Driver License
- Clean background check
- Drug Free
