PHS 112 Homework (5th ed. of Hewitt): A list of suggested homework problems is provided below. Work all the problems listed in bold type. The other problems are for additional practice. The answers for all of the odd numbered problems are at the end of each textbook. When you think you understand the material in the chapter, work the Readiness Assurance Test (RAT). The answers to these questions are at the end of the test. The homework is not graded, but it is not surprising that doing homework improves quiz/test scores. There are many good questions in addition to the ones listed below if you want more practice.

As you read the text, think through each of the Checkpoint Questions.
