

Mobile Authenticator App Instructions for Microsoft MFA Setup

Installing the Mobile Authenticator App.

Before you can configure your account, you will need to download and install the Microsoft Authenticator app on your mobile device.

The Authenticator mobile application can be found in your device's app store listed as "Microsoft Authenticator".

Android iOS

Configure the Authenticator App.

Choose Mobile app from the drop down and select "Receive notifications for verification" This will ensure that your phone notifies you when an authentication request is initiated.

Select [Set up] to continue to the mobile app configuration

Additional security verification	
Secure your account by adding phone verification to your password. View video to know how to secure your account
